Special Days Come Only Once in a Lifetime... Treasure your Memories

Preserve your Gown with our Diamond Services

The gown of your dreams may be in your attic

Restoration

If the wedding gown of your dreams is a family gown that time has yellowed and stained, call us! We specialize in restoring antique gowns to their true color without damaging the delicate fabrics or dyes. Our Diamond Restoration Process removes stains and discoloration that ordinary dry cleaning cannot. Call us today for a free consultation.

Our Diamond Service

Five-Step Process

Cleaning

We offer one of the most detail-oriented, expert gown cleaning and preservation services available anywhere.

Free Evaluation: We will gladly give you a free consultation and estimate for the care of any fabric, new or old.

Hand Cleaning: We hand-treat and clean each gown individually - never in combination with other dresses. We take every precaution to protect delicate beads, embroidery, and lace during the cleaning process.

Anti-Sugar Stain Treatment: Spills containing sugar, salt and acid often dry clear and cannot be seen. These hidden stains do not dissolve during ordinary dry cleaning and turn an ugly brown over time. Our unique anti-sugar stain treatment, featured in *Modern Bride* and *Bride's* magazines, ensures that all sugar, salt and acid - seen or unseen - is removed.

Personal Inspection Available: We encourage you to inspect your gown before our MuseumCare® Preservation is completed.

International Guarantee: We are members of the Association of Wedding Gown Specialists, which is represented in more than 500 cities around the world. Bring your wedding gown to any participating Association of Wedding Gown Specialists drycleaner at any time and they will inspect and press the gown at no charge.

Turn your precious memories into a treasured heirloom

Preservation

Preserve your wedding gown with our **Diamond Preservation Service** and turn the memory of your special day into an heirloom. Perhaps someday your daughter or granddaughter will walk down the aisle wearing the same gown that meant so much to you.

- **Completely acid-free** heirloom preservation chest.
- **Totally acid-free tissue paper** to cushion and manage folds.
- **A pair of virgin cotton white gloves** for safe handling.
- **Consider a zero-carbon offset** for sustainability in creating a greener world.
- **A Muslin Wrap** - provides a stable and non-acidic environment in which to rest.
- **Monogrammed Muslin Preservation Chest Covers** - An acid-free buffer against contaminants, customized with your personal monogram.
